Professional Summary

Ambitious Developer skilled in creating Mobile and Web experiences for users. I enjoy challenges and find excitement in fixing my weaknesses.

Work History

Developer, 12/2012 to 09/2013

SiddyTalk(Startup) - Houston, TX

Led a team of myself and one other person to design and develop a social networking app tailored towards events. Was responsible for setting deadlines and goals.

- Database schema design
- Developed mobile iOS Application
- Created proof of concept web application for troubleshooting
- Tracked user metrics and provided user support

Developer, 05/2014 to 05/2015

Mioty(Startup) - Houston, TX

Developing a platform that allows a rapid creation of Internet of Things applications as well as visualizing collected data via configurable dashboards.

- Designed and developed mobile application for iOS and Android platforms.
- Performed backend development using Node.js framework.
- Primary Developer on Angular frontend
- Provided support for cloud operations. Developed middleware between frontend/backend components to Azure Service Bus.

Hackathon Organizer, 01/2015 to present

University of Houston hackathon, CodeRED - Houston, TX

Was in charge of getting in contact with sponsors as well as building a web app for the event. This web app acted as a portal for the organizers to communicate as well as handled the attendee sign-up.

Education

University of Houston - Houston, TX

Bachelors of Science: Computer Science, Current
